

AUTEL MAXI HVAC AC909 ADVANCED A/C DIAGNOSTIC TABLET

STOP GUESSING. START DIAGNOSING.

AC909 Tablet

- P/N: AC909**
ADDITIONAL ITEMS INCLUDED:
- Refrigerant Hose
 - Vacuum Hose
 - R134a Service Coupling (Red/Blue)
 - R1234yf Service Coupling (Red/Blue)
 - R134a and R1234yf Adapters

YESTERDAY'S A/C IS TODAY'S THERMAL MANAGEMENT SYSTEM

For decades, automotive A/C service has revolved around the same routine: Recover. Recycle. Recharge. And hope the problem is fixed. But today's vehicles are built around intelligent thermal management. The Autel MaxiHVAC AC909 brings leak testing, refrigerant service, and live vehicle diagnostics together in one intelligent workflow—giving technicians complete system visibility to diagnose, repair, and verify with confidence.

AUTEL

COMPLETE SYSTEM VISIBILITY

Graphical diagnostics: multiple input fusion combines live refrigerant pressures, temperatures, humidity, and system measurements into a single analysis screen, providing a complete view of the vehicle's thermal management system.

ONE INTELLIGENT WORKFLOW

Connect leak testing, refrigerant service, and live vehicle diagnostics in one guided workflow designed to reduce guesswork and improve first-time fix rates.

GUIDED DIAGNOSTICS

Illustrated, step-by-step procedures combine commercial HVAC diagnostic principles with automotive repair to help technicians quickly isolate faults and verify repairs.

ADVANCED COMPONENT TESTING

Perform dedicated compressor, evaporator, condenser, metering device, and blockage diagnostics to pinpoint component failures with confidence.

VERIFY BEFORE YOU CHARGE

Confirm system tightness, moisture removal, and refrigerant charge using integrated nitrogen testing, precision micron measurement, and live system verification.

BUILT FOR MODERN THERMAL MANAGEMENT

Designed for today's electronically controlled A/C systems, hybrids, EVs, advanced heat pumps, and evolving refrigerant technologies.
