New Production Management System (PMS) On-Line

Shenzhen, China (2013-1-22) - As part of the Autel Rapid Continuous Improvement programme, we will be installing a new software on our server in early January 2013. This system can monitor our products from beginning. Workers in assembly line, quality control personnel, delivery agents and distributors all leave their marks in our system, which enables us to track every machine the whole time. During this transitional period we may encounter some slight delays in processing your registration, but hope they will be minimal. We do apologise in advance for any inconvenience.

For more information about the company, visit www.auteltech.com.

About Autel:

Located in Shenzhen, China, Autel specializes in development, manufacture and marketing of diagnostic tools, equipment and accessories in the automotive aftermarket. Autel's products and services include basic OBDII code readers, full-featured OBDII scan tools, videoscopes, special application service tools and comprehensive diagnostic analysis system MaxiDAS. Since our foundation, we have been committed to creating maximum long-term value to our customers by providing quality-assured, easy-to-use, cost-effective and innovative products and solutions.
