AUTEL UPGRADES MAXICHECK TO SUPPORT 4 NEW SPECIAL APPLICATIONS

The Swiss Army Knife of Productivity Apps.

Shenzhen, China (2013-3-3) – AUTEL today announced the addition of 4 new special applications to their popular service tool, MaxiCheck series, including TPMS service, ABS/SRS diagnostics, SAS adjustments and DPF regeneration. Delivering more functions, MaxiCheck's new features give shop owners and their technicians an opportunity to generate extra income from added services.

DPF Regeneration
No more DPF guesswork now!

Highlights:

- Resets the DPF light after the filter has been replaced
- Performs DPF regeneration
- Micromanages the injection rate
- Resets ECU when fitting new DPF
- Resets EOLYS additive lights
- Retrieves/ erases DPF-related codes with code definition

※ DPF (Diesel Particulate Filter)

TPMS Service
Designed for the Novice, Yet Powered for the Professional

Highlights:

- Extensive brand coverage
- Reads / writes sensor ID from vehicle ECU
- Reads / clears codes of TPMS system and turns off TPMS warning light
- Reads, records and plays back live data of TPMS sensors (ID, pressure, temperature, battery, etc)
- Programs vehicle ECU to learn sensor IDs and positions
- Retrieves TPMS ECU information

ABS/SRS diagnostics
A wonderful utility that can talk to your ABS / SRS system!

Highlights:

- Reads / clears codes of ABS/SRS system and turns off ABS/SRS warning light
- Reads, records and plays back live data of ABS/SRS sensors
- Performs bi-directional tests such as cycling the ABS solenoids, running pump motor, activating seatbelt reminders and so on
- Retrieves ABS/SRS ECU information

SAS adjustments
Adjust steering angle with incredible simplicity!

Highlights:

- Reads / clears codes of steering system and turns off steering system warning light
- Reads, records and plays back live data of SAS sensors
- Performs steering angle zero position calibration
- Clears steering system fault memory

“There has been always a strong business need among aftermarket shops to do some side works mostly done by the dealer shops previously,” explained Frank Li, president of AUTEL. “AUTEL is trying its best to answer these calls with this multifunctional application tool, MaxiCheck Series. We’re taking our commitment to repair shops one step forward, enabling them to increase productivity with one single tool.”

“I always regard diesel particulate filter reset a main dealer only product. It is so complicated we don’t want to get involved with DPF,” wrote an AUTEL customer from New York, USA in an unsolicited email. “But now MaxiCheck-DPF provides a perfect alternative to expensive diagnostic tools. It is easy-to-use and portable, definitely a good choice carrying out service tasks on the spot.”

With the new four special apps added, AUTEL MaxiCheck Series now offers 6 apps in one single tool, which covers most of daily service work of technicians. It is simple to use and requires no special trainings. Powered by the vehicle and compact size, it can be used anytime, anyplace, anywhere. We also provides continuing updates which future-proof your tool.
